@kirkyuan

EXPERIENCE

University of Calgary - *Undergraduate Researcher*
May 2017 - August 2017

Used a Leap Motion device to capture hand motions and created a Unity program to explore a gesture-based marking menu

PROJECTS

JetPack Front-end

Created a payments page using AngularJS that allows users to input credit card info. Utilized the CardJS library to make input field beautiful. Screenshots here <https://imgur.com/a/y8s6t>

Uncharted Realms

A collectible card game written in Lua based around its very own neural network. Find out more on GitHub <https://github.com/RyanAbraham/Uncharted-Realms>

Giveaway App

A team of 7 working with Shopify Engineers using Ruby on Rails to build a Shopify app that can generate a link to enter the giveaway and displays a randomized winner after ending the giveaway <https://github.com/jaydenwindle/decode2017>

Personal Website

Created my own personal webpage from scratch using HTML, CSS, Bootstrap, jQuery, and a Express backend. <http://www.kirkyuan.com/>

EDUCATION

Carleton University - *Sept 2015 - Current*
Computer Science Major, Minor in Statistics
